Description Editorial Solutions Submissions

20. Valid Parentheses Solved

Easy Topics Companies Hint

Given a string `s` containing just the characters `'('`, `'('`, `'{'`, `'{'`, `'['` and `']'`, determine if the input string is valid.

An input string is valid if:

1. Open brackets must be closed by the same type of brackets.
2. Open brackets must be closed in the correct order.
3. Every close bracket has a corresponding open bracket of the same type.

Example 1:

Input: `s = "()"`

Output: `true`

Example 2:

Input: `s = "([)]"`

Output: `false`

Code C++ Auto

```
1 #include <iostream>
2 #include <stack>
3 using namespace std;
4
5 class Solution {
6 public:
7     bool isValid(string s) {
8         stack<char> st;
9         for (char c : s) {
10             if (c == '(' || c == '[' || c == '{') {
11                 st.push(c);
12             }
13         }
14         return st.empty();
15     }
16 };
```

Testcase Test Result
